

Full ERP Accounting Module

Feature Checklist — Complete Scope of an ERP Accounting System

1. Core Accounting

- Chart of Accounts (multi-level, customizable)
- General Ledger
- Journal Entries (manual, recurring, reversing)
- Trial Balance
- Fiscal year & period management (open/close periods)
- Multi-currency support with exchange rate handling

2. Accounts Receivable (AR)

- Customer master data
- Sales invoices & credit notes
- Payment receipts & allocation
- Customer aging reports
- Customer statements
- Advance payments / deposits

3. Accounts Payable (AP)

- Vendor / supplier master data
- Purchase invoices & debit notes
- Payment vouchers
- Vendor aging reports
- Advance payments to suppliers

4. Banking & Cash

- Bank & cash accounts
- Bank reconciliation
- Cheque management (issued / received, post-dated cheques)
- Petty cash management
- Fund transfers between accounts

5. Tax & Compliance

- VAT configuration (15% for KSA, zero-rated, exempt)
- VAT return reports (input / output VAT)
- ZATCA e-invoicing Phase 1 & 2 (QR/TLV, XML, clearance & reporting APIs)
- Withholding tax (if applicable)

6. Fixed Assets

- Asset register
- Depreciation (straight-line, declining balance)
- Asset disposal, transfer & revaluation

7. Financial Reports

- Profit & Loss statement
- Balance Sheet
- Cash Flow statement
- General Ledger detail report
- Day book / transaction register
- Comparative reports (period vs period)

8. Supporting Features

- Cost centers / departments / projects
- Budgeting & budget vs actual
- Audit trail (who changed what, when)
- User roles & approval workflows
- Document attachments on transactions
- Opening balances import
- Year-end closing entries

9. Integrated Modules (Full ERP)

- Inventory (stock valuation feeds COGS)
- Sales & purchase orders
- Payroll (salary journals, GOSI for KSA)

Note for the Saudi market: VAT + ZATCA e-invoicing compliance and Arabic/English bilingual support are usually the make-or-break features.
